Sam Patterson

Technical Builder & Communicator

Grand Rapids, MI · sam@sampatt.com · linkedin.com/in/sampatt-dev · github.com/SamPatt · sampatt.com

I've spent 15 years building at the intersection of technology, communication, and community — from founding a tech policy program in DC, to co-founding a venture-backed decentralized marketplace, to writing about Bitcoin before most people had heard of it. Today I build AI-powered tools and write about emerging technology, regularly reaching the front page of Hacker News.

EXPERIENCE

Technical Operations Specialist June 2026 – Present
MessageWrap · Grand Rapids, MI

- Built and run the company's MCP server and its Claude integration, giving AI assistants structured access to company data
- Built the database export pipeline that feeds the MCP server
- Own company infrastructure, the production database and the integrations between platforms

Co-Founder & Head of Operations 2015 – 2020
OB1 (OpenBazaar) · Remote

- Co-founded and helped build OpenBazaar, an open-source decentralized marketplace using Bitcoin for peer-to-peer commerce
- Raised $9M in venture capital from Andreessen Horowitz and Union Square Ventures
- Served as developer advocate and documentation lead, managing a global open-source community
- Featured in Wired, Forbes, Yahoo Finance; presented at conferences in Prague, Guatemala, New Hampshire

Senior Policy Analyst & Research Fellow 2011 – 2015
Stand Together · Washington DC

- Founded and directed the technology policy program
- Conducted research on how technology policy affects individual well-being
- Created the Crony Chronicles project, a public awareness initiative on political cronyism

Freelance Technical Writer & Voiceover Artist 2020 – Present
Remote

- Technical tutorials and educational content for open-source projects
- Recorded and published audiobooks on Audible
- Blog writing with multiple Hacker News front-page hits
